

We're putting our energy into helping kids get theirs back.

At PSEG, our power goes into more than just homes and offices. It goes into the community. In addition to our ongoing volunteer programs and fundraisers, we're building a world-class children's hospital for New Jersey. Once complete, the PSE&G Children's Specialized Hospital and its surrounding facilities will include pediatric acute care, rehabilitation and research in one location for the first time ever. With such powerful resources, we're giving doctors and nurses the power to turn "patients" into kids again. Making life better for the people who count on us today and tomorrow – it's what makes us more than just a power company.

PSEG

We make things work for you.
