

Commercial Gas Service – Adding Load / Changes For Industrial, Commercial, and Multi-Unit Residential (4+) Customers

NOTE: MISSING INFORMATION ON APPLICATION WILL RESULT IN DELAY IN PROCESSING YOUR REQUEST

- The commercial gas load data sheet is to be used for new service/changes to gas load and excess flow valve requests or industrial, commercial, and multi-unit residential (4+) customers.
- When completing an application for generators and/or tankless water heaters, specification sheets are essential, especially when fuel pressure requires a minimum of 7” water column or higher. Please specify make, model of equipment, and pressure requirement.
- Site plans are required for gas layout to begin when no foundation at the site. Plans must be full size and to scale; include footprint of building and show at least one cross street. Site plans may be mailed to the appropriate address below.
- Please call Construction Inquiry Department at the appropriate number below, when requesting relocations with no changes in load or upgrade (required information: BTU input for entire building).

For Construction Inquiry purposes, PSE&G service territory is divided into Northern & Southern Counties.

*Note: Emails below are for completed load data sheets only. For all inquiries call the appropriate phone number below.

Northern Counties:

Bergen, Essex, Hudson, Hunterdon, Middlesex,
Morris, Passaic, Somerset, and Union

Public Service Electric and Gas Company
